# Elegance and comfortable air distribution

The Zehnder ComfoGrid Linea decorative grille ensures effective air distribution in any living situation. With its quiet supply of fresh air, it guarantees optimum ventilation and maximum living comfort.

The design of the decorative grille opens up a wide range of possibilities for its use. With its stylish look, it serves as an elegant feature and elevates the design of the living space. At the same time, its discreet appearance means that Zehnder ComfoGrid Linea can blend subtly into any environment.

The decorative grille is available in three high-quality surfaces. With brushed stainless steel, white glass look or black glass look, it can be integrated into almost any setting. The special construction is also worthy of mention: it makes the decorative grille almost opaque, forming a harmonious front.

The technical flexibility of Zehnder ComfoGrid Linea is demonstrated by the range of possible uses. The decorative grille can be used for extract air or supply air and is suitable for both ceiling and wall mounting when used with the Zehnder CSB-P housing. Zehnder ComfoGrid Linea's excellent performance, with an air volume of up to 90 m<sup>3</sup>/h, means that it can be used in any situation.

## Flexible use

For extract air or supply air

## Perfect combination
